## About ASSOCHAM

ASSOCHAM is the oldest industry association serving the nation since 1920. ASSOCHAM as an Apex National Business Chamber, has the unique distinction of representing over 4.5 lakh large, medium & small-scale companies. ASSOCHAM focus has been on four pillars of sustainability, empowerment, entrepreneurship, and digitisation (SEED). ASSOCHAM serves as a bridge between the industry and government on policy and regulatory, ease of business and educational issues.

## About ASSOCHAM National Council on Education

The ASSOCHAM National Council on Education was conceived by leading academicians and administrators in 2007-08. The council was formed to engage Government, Policy makers, academicians, think tanks, experts and consultants on education related matters. The scope covers engaging stakeholders on current affairs on education, administration, training and capacity building for academicians as well as undertake cutting edge interventions on diverse subjects ranging from national to state agendas. The NCE has been delivering several conferences, dialogues, round tables, seminars, exhibitions, workshops and similar engagements with leading institutes, universities, K12 and corporates. Several startups including EdTech companies have also been engaged through the NCE in recent years.

The council also emphasizes improving access to education, especially for underprivileged and marginalized communities. It works towards identifying and addressing issues such as affordability, quality, and infrastructure, and develops new models for delivering education, including technology-enabled and online learning platforms.

Another significant objective of the council is to promote global collaboration and cross-border partnerships to drive excellence in education. It aims to create opportunities for Indian educational institutions to engage with leading international institutions and explore best practices for innovation and excellence in education.

The National Council on Education is a valuable initiative by ASSOCHAM towards improving the education sector in India. Through its activities and collaborations with various stakeholders, the council aims to create a more dynamic, inclusive, and innovative education system that can meet the evolving needs of learners and employers in India.

## PROFILE OF PARTICIPATING ORGANISATIONS

- Universities/Higher Educational Institutions
- B-Schools
- Schools
- Non-Governmental Organizations
- Skill Training Providers
- EdTech Companies
- Education Service Providers

## About 16<sup>th</sup> International Education Leadership & Skill Development Summit 2023

The use of technology coupled with innovation has the potential to improve education, to develop ingenuity, empower people, bolster governance, and stimulate the effort to achieve the human development goal for our country.

Keeping in view the technology driven times, the core of education should be focused on new education system where it should be based on creativity and innovative skills. Vocational Education should be implemented at larger scale as it opens more opportunity for the youth, and that India has a lot to learn from G20 nations in this regard. Vocational short courses in can take place through the amalgamation of local industries with the educational institutes to provide a sustainable education to all.

According to NEP, focus on giving education a much needed thrust by applying scientific and practical knowledge is necessary. The inter-generation and intra-generation needed to be filled in present times. The scenario of higher education now lays on 4 years integrated Under Graduation where an individual is also engaged in research work with regular learning. The education is not a two way but a three way process where the student, teacher and the society should benefit from each other.

This year, the budget allocation for Education is around Rs. 1.00 lakh crore. This has been undertaken for providing a boost to education, skill development and entrepreneurship, research and development, digital infrastructure, green growth and job creation. The vision for the budget is laying a blueprint for Bharat@100 for transforming India into a technology driven knowledge-based economy.

In the light of above and to find out how best to do so, **ASSOCHAM is organising 16<sup>th</sup> International Education Leadership & Skill Development Summit 2023.**
